## Fluoxastrobin Facts

- Fame Fungicide contains fluoxastrobin, a broad-spectrum, xylem-systemic fungicide for the control of some of the most destructive turfgrass diseases such as fairy ring, brown patch, summer patch and necrotic ring spot.
- Fluoxastrobin is not just another strobi. The molecular design of fluoxastrobin increases leaf systemicity and provides even distribution giving it an advantage over other strobilurin fungicides.
- Fame Fungicide is the foundation of affordable turf disease program, providing protection from major foliar and root diseases at a competitive cost per acre, so you can use it almost anywhere on your course.
